

At Voxx Technologies, we service a variety of industries including Aerospace, Telecommunications, Networking, Consumer, Industrial and Contract Manufacturing. We recognize the manufacturer's need to maintain a continuous and flexible flow of product in order to sustain a balanced production line. This is why we stock, and have access to, over a billion components ready to ship for next day delivery!

We work with many Fortune 500 companies to provide a wide range of value-added products and services:

International Sourcing: We can cross reference, track and locate any part in

the domestic or international semiconductor market in seconds via our part-tracking system.

Inventory: Whether we're tracking scarce components or volume shipments per a bill of materials, Voxx Technologies can deliver your requirement on time, every time, no matter how quickly you need it.

Reliability: Established, long-term relationships with major OEMs throughout the world ensure a strong financial position, allowing us to offer credit terms to qualified customers.

Excess Inventory Program: We can tailor a program specific to your

company, allowing for flexibility and optimum equity for you, the customer.

Savings: With our current inventory, we are able to quote 15% to 20% less than factory or franchise on many commodities.

Market Analysis: Real time Information showing commodity pricing and worldwide inventory levels.

Warehousing and Inventory: With over 50,000 square feet, we stock and control inventory from warehouses in San Diego, Tijuana, Mexicali and Chihuahua Mexico using a high-tech system with independent databases for each customer.

Q.C. Measures: Voxx has board-level insurance up to \$10 Million. If any Voxx supplied component compromises a build, Voxx will pay the entire build value. All materials are factory sealed, include certificate of compliance with liability, and carry a 100% guarantee for form, fit and function for 24 months.

Cost Reduction Program: Voxx Technologies can lower material costs up to 80% below market through our vast inventory and OEM supplier rewards program. Our stock option program allows us to augment our own stock with the stock of some of the world's largest OEMs, saving our customers millions of dollars while lowering their PPV.

Our Customers Dictate... Voxx Technologies Listens and Delivers.
